~~ENGINE REPAIR MANUAL ADE 360 SERIES~~

Valve Clearance Valve clearance is there to allow the valves to cool in between combustion events (spark), and to make sure the valve closes properly and contains the combustion explosion. You need to cool the valves a little bit, the exhaust valve moreso than the inlet, as it's what sees the most heat as spent burnt gases go past it into the exhaust port.

~~Ananzi~~

Turn off the engine; Remove one valve cover and install your deflector clips, custom valve cover, or whatever apparatus you are using to keep the oil splash to a minimum. Start the engine back up. Begin to loosen one of the rocker arm adjusting nuts. You should hear the valvetrain just start to "clatter".
