NLP Ontology, Epistemology and Methodology. By Bruce Grimley. July 2016. Grimley, 2013 p2 Ontology asks questions about the very essence of our being and existence. The Ontology of NLP is that there is an objective reality, however we cannot map it perfectly due to our limited sensory scope and intelligence.

~~NLP Ontology Epistemology and Methodology.~~

Epistemology. Having thought about the Ontological positions, the researcher must then consider the Epistemology of his/her work. The Epistemology is about the information that counts as acceptable knowledge in NLP and how it should be acquired and interpreted. Once a researcher accepts a particular epistemology, s/he usually adopts methods that are characteristic of that position, again allowing experience to dictate filters and preferences, so a central question to the research is whether ...

The research paradigm — methodology, epistemology and ontology — explained in simple language

Published July 15, 2015 by Salma Patel I have put together this post to explain what a research paradigm is, which includes ontology, epistemology, theoretical framework and methodology, and why it is important for your research or PhD.

~~The research paradigm — methodology, epistemology and ...~~

Ontology: “ Ontology is a branch of philosophy that is concerned with the nature of what exists. It is the study of theories of being, theories about what makes up reality. In the context of social science: All theories and methodological positions make assumptions (either implicit or explicit) about what kinds of things do or can exist, the conditions of their existence, and the way they are related ” .

~~Difference Between Ontology and Epistemology | Compare the ...~~

Ontology therefore sits at the top of a hierarchy under which epistemology, methodology and methods all ' get into line ' . Many researchers deal only superficially with questions of ontology and bury discussion of both ontology and epistemology by simply aligning with a method or methodology: ' this is a quantitative study ' ; this is ' case study ' , ' action research ' or ' grounded theory ' .

In order to appreciate these philosophical beliefs, several key concepts and ...

~~Research terminology simplified: Paradigms, axiology ...~~

This is known as your research philosophy and is done through your ontology and epistemology. Research philosophy is essentially a set of beliefs or metaphysics that represent the researcher ’ s world-view; the nature of ‘ the world ’ , the individual ’ s place in it and the range of possible relationships to that world.

~~Ontology and Epistemology: A Simple Explanation—Tourism ...~~

Simply put, ontology relates to the assumptions we make about the nature of reality, epistemology sets out beliefs about how one might discover knowledge about that reality and methodology specifies the tools and techniques that we use in the conduct of our research. Critically, these three words form relationships to each other.
