The Porsche 996 was the first major redesign of the 911, and is essentially a different car from the ground up. Of the few components carried over from the earlier 993 models, the multi-link alloy suspension and subframe continued to be used in the 996 to provide unbelievably sticky traction and stability, even at ludicrous speed, which the 996 is fully capable of achieving.

The Type 996 introduced in 1998 to replace the 993 series, represented two major changes for the venerable 911 lineage: a water-cooled flat-6 engine replaced the popular air-cooled engine used in the 911 for 34 years, and the body shell received its first major re-design. Changing to a water-cooled engine was controversial with Porsche traditionalists, who noted this as the end of the 'true ...
